

Kiran S Poojary

Master of Computer Applications

+917026169918 | kiranpoojarikiran2634@gmail.com | Mangalore, Karnataka, India | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

MCA graduate with a solid foundation in computer science and hands-on experience in IT support. Skilled in IAM Management, Email onboarding/offboarding processes, Software license lifecycle, Ticket management, and SLA compliance. Proficient in Windows/Linux troubleshooting and basic networking, with strong communication and adaptability skills. Dedicated to ensuring smooth IT operations and delivering reliable support in dynamic environments.

EXPERIENCE

Executive-Command Center

CMS Info Systems Limited

Dec '25 — Present

Mangalore, Karnataka, India

Monitored sensor-based security systems and AI-generated alerts across ATM and branch locations to ensure the timely identification of security incidents. Coordinated with Branch Heads (BH), Deputy Branch Heads (DBH), and branch staff to facilitate prompt incident response and resolution. Logged, tracked, and escalated alerts in accordance with established operational procedures while maintaining accurate incident records. Supported efficient issue resolution through effective communication, coordination, and follow-up with relevant stakeholders.

AI-Powered Web Developer Intern

Kakunje software Private Limited.

Nov '24 — Feb '25

Mangalore, India

- Designed and developed AI-integrated web applications with frontend (HTML, CSS, Javascript, Bootstrap) and backend (PHP, Python, MySQL) technologies.
- Integrated YOLOv8 for vehicle detection and EasyOCR for number plate recognition, enabling real-time AI functionality.
- Implemented data processing workflows using OpenCV and Flask, and created role-based dashboards for Admin, User, and Supervisor.
- Performed testing, debugging, optimization, and documented the complete project flow, architecture, and deployment process.

EDUCATION

MCA in Computer Applications, Mangalore Institute of Technology & Engineering

Jan '24 — Nov '25

Moodbidri, India

BCA in Computer Applications, Sri Mahaveera College

Jan '20 — Sep '23

Moodbidri, India

CERTIFICATIONS

User-centric Computing For Human Computer Interaction, IIT Guwahati

PROJECTS

AI-Based Smart Parking System

- The Smart Parking System is a web-based application integrated with Artificial Intelligence to automate vehicle entry, parking slot allocation, and real-time monitoring. It uses YOLOv8 for vehicle detection and EasyOCR for license plate recognition, enabling accurate and efficient identification of vehicles. The system is built with HTML, CSS, JavaScript, and Bootstrap for the frontend, PHP and MySQL for the backend, and Python with OpenCV and Flask for AI integration. It features separate dashboards for Admin, User, and Supervisor roles, allowing slot booking, occupancy tracking, and secure access control. This solution reduces manual work, minimizes errors, and enhances parking security in environments like malls, offices, and hospitals.

SmartScheduler

- SmartScheduler is a web-based subject allocation system designed to streamline the process of assigning subjects to faculty members in educational institutions. The system automates workload distribution based on predefined criteria such as faculty expertise, subject availability, and timetable constraints. It is built using HTML, CSS, JavaScript, and Bootstrap for the frontend, with PHP and MySQL handling backend logic and database management. SmartScheduler provides role-based access for administrators and faculty, ensuring secure data handling and efficient allocation. This solution reduces manual errors, saves time, and enhances transparency in academic scheduling.

PUBLICATIONS

AI-Powered Augmented Reality (AR) Approach for Real-Time Wound Healing Visualization and Infection Risk Prediction

IEEE Xplore Digital Library

Nov '25

An AI-based AR system that shows real-time wound healing and alerts doctors to possible infections. The paper was published in the IEEE Xplore Digital Library and presented at the IEEE International Conference on Intelligent Systems and Pioneering Innovations in Robotics and Electric Mobility.

SKILLS

Technical Windows, Linux, Networking, HTML, Figma, Python, IAM Management, CSS, SQL, Javascript

IT Operations Email Onboarding/Offboarding, Ticket Management & SLA, Software License Lifecycle, User Access Lifecycle

Soft Skills Multitasking, Teamwork, Time Management, Self-learning, Adaptability, Communication

ACHIEVEMENTS

- Participated in SAP Hackfest'24
- Participated in SmartIndia Hackfest'24
